Eaton's Tripp Lite series SmartOnline UPS, 2U rack/tower or tower, 700–3000 VA

Enhanced power protection for critical network equipment

The Tripp Lite series SmartOnline UPS has a refreshed look and enhanced features. Network capability, long battery runtimes and an easy-to-use LCD control panel make these rack/tower and tower double-conversion UPS models an outstanding value for minimizing downtime in network closets, server rooms and edge computing sites.

Power and protect sensitive IT equipment

Highest level of power protection
Double-conversion technology continually converts incoming AC power into DC power, and then resynthesizes it back into AC power with a pure sine wave.

- Continuous on-line operation isolates sensitive equipment from power problems on the AC line.
- Automatic restart after outages reduces the need for onsite visits.
- In the event of an overload or internal UPS fault, the load is transferred to utility power to maintain operation (without battery backup).

Reliable battery backup to prevent downtime
Zero transfer time to battery allows uninterrupted operation.

- User-replaceable, hot-swappable VRLA internal batteries outlast brief outages and permit graceful system shutdown during longer blackouts.
- Models with extendable runtime support up to four external battery packs (sold separately).

Easily monitor and manage UPS operation

User-friendly local monitoring and control
Status LEDs and a menu-driven LCD make it easier to identify alarms and faults. The control panel on rack/tower models rotates to accommodate horizontal or vertical UPS installation.

Advanced remote monitoring
An optional network card (WEBCARDLXE) provides SNMP-based UPS management. Free downloadable PowerAlert software supports remote monitoring and control.

- USB and RS-232 serial ports provide additional communication options. (Cables are included.)
- RPO/ROO port allows remote shutdown or restart of connected equipment.

Product support

Eaton provides free product support via phone, email or chat. If you have a question or need to find a replacement battery, Eaton can help.

Choose a tower or rack/tower UPS to protect distributed IT equipment. Rack/tower UPS includes tower stands for vertical placement.

Model SU2200XLCD shown

1 Status indicators (online, battery, bypass, fault)

2 Menu-driven LCD

3 Control buttons (escape, up, down, enter, on/off)

4 Rack mounting brackets (removable)
Rack/tower UPS mounts in 19-inch 4-post racks. Tower stands are included for vertical deployment.

5 Input power cord with plug (120V UPS)

6 Input power inlet (208V/230V UPS)

7 Network card slot
Slot accepts WEBCARDLXE network management card.

8 RPO/ROO connector

9 USB communication port

10 RS-232 (DB9) serial communication port

11 Relay output connector

12 External battery pack detection port (except SU700XLCD)

13 External battery pack connector (except SU700XLCD)

14 Ground screw

15 Primary group outlets

16 Group 1 programmable outlets

17 Group 2 programmable outlets
