

# SIMPLIFIED VOIP ENABLED FAX SOLUTION

Organizations are consolidating voice, fax and data resources to cut costs and simplify their communications infrastructure. Voice over IP (VoIP) and Fax over IP (FoIP) are two technologies which have become critical to organizations as they create a unified strategy for voice and data communications. These technologies allow companies to reduce their total cost of ownership by eliminating telephony hardware and consolidating the management of voice, data and fax communications.

Because IP PBX's are software based and rely on voice optimized compression, many businesses have experienced high fax transmission failure rates, often greater than 40%. FaxAgent has been architected to address this issue and provide organizations a robust and reliable fax solution that integrates with their IP PBX environment. The FaxAgent system leverages the T.38 capability of leading IP gateways, including Cisco, 3COM, Asterisk, Freeswitch, 3CX, Alcatel, Avaya, Fonality, ShoreTel, Allworx, Mitel.

**DIRECT PBX INTEGRATION**

Setup as SIP extension on PBX  
Software or hardware available  
Zero driver installation required  
Provides web portal for users  
Supports analog, digital or voip  
Virtual machine friendly

Cisco • 3COM • Asterisk • Freeswitch • 3CX • Alcatel • Avaya • Fonality • ShoreTel • Allworx • Mitel
